

Option A: Bootstrap CV distribution by target CV level

Points = individual bootstrap years; diamond = target (1:1 line).
Colour intensity = scenario variability level.

Scenario proxies: Baseline CV 1.5–2.5 (this study); Moderate CV 2.5–3.0 (SSP2–4.5, Shiau & Huang 2014; Tung et al. 2016); High CV 3.0–4.0 (SSP5–8.5, Tong et al. 2016)
