

Pondage Advantage over Run-of-River

Difference in $P(\text{NPV} > 0)$: $\Delta = P_{\text{Pondage}} - P_{\text{Run-of-river}}$

CAPEX = NTD 2.5B (baseline); LTV = 80%; equity rate = 8%; project life = 35 yr.

Positive delta (green): pondage achieves higher $P(\text{NPV} > 0)$ than run-of-river.
